THURS 5TH SEPTEMBER 4.30 PM ON-FARM SALE – ON-LINE BIDDING

Viewing Days: Sunday 27th August 3pm Thursday 31st August 3pm Or call to arrange a viewing. Videos at www.incheochfarm.co.uk

MATERNAL GENETICS PADDOCK REARED FOR FERTILITY AND LONGEVITY

Functional Efficient Robust

Why a WORKING GENES Bull Sale?

We understand that fertility in a functional, robust cow is the key to an efficient suckler herd. Our breeding program is designed to promote those traits—200 pedigree, recorded cows managed in commercial conditions, with a 2yo calving and strict culling policy.

These bulls have been developed on a low intensive diet to encourage fertility and longevity. Our entire year group of Simmental, Angus and Luing bulls are offered—reared the way we would want them.

'Functional, fertile cattle, structurally sound for longevity, and with good temperament will never go out of style'

The Incheoch **SIMMENTAL** herd of 40 - mostly polled - cows is based on the most functional cow families from the previous 'Dirnanean' herd. Calving ease, structural soundness for longevity and a calm, maternal character have always been a priority—we've turned up the pressure on lower mature weight, ease of fleshing and fertility in order to find you sires that will leave lower maintenance, regular calving, long lasting daughters ...and a steer with do-ability and a good top.

Inchisla **ANGUS** are bred to provide a short-gestation, calving-ease sire and leave easy-finished grass-type cattle. Clare has produced us bulls particularly suited to go to yearling heifers, which have left calves with performance hard to fault.

The Dirnanean **LUING** cows have been the backbone of our business for over 45 years. Fertile, hardy, easy to manage, fleshing ability from 2nd quality forage, and a temperament that makes working with cattle a pleasure. Our pure Luing steers can put a lot of weight on at grass and finish before their second winter—if you are visiting, make sure to have a look at them. More cattlemen are turning to the Luing bull for an injection of no-nonsense cow-traits into their herd.

Welcome to the 6th WORKING GENES Bull Sale

Bulls (15-19 months) 14 Simmental, 2 Angus, 4 Luings

On-line, silent auction by Yourbid — ends 4.30pm 5th September.

Come to the Sale to see bulls in their paddocks and bid without the pressure of the auction-ring.

Videos coming, and viewing days: Sunday 27th August 3-8pm Thursday 31st August 3-8pm

"Robust bulls, bred from Functional, Efficient cows has been our goal for many years now. We run just over 200 pedigree, performance recorded cows, and select hard for fertility, structural soundness, good temperaments and easy calving. We find that easy-fleshed, medium framed cattle with a bit of maternal character tend to be the ones who tick the boxes—and we think the bulls we have on offer today can transfer these traits to your herd.

These bulls were not creep fed, had paddock exercise through the winter and have been summered at grass. Our non-intensive system of developing bulls lets you pick out the ones that can put on flesh from forage.

This group of bulls have been halter broken but not led, and their feet are shown untrimmed. $\ensuremath{\,^{\prime\prime}}$

The McGowan family

Terms & Conditions

- Bidding in £ pounds.
- The sale is being held with the help of Pentland Auctions, but purchases will be invoiced by Messrs Finlay McGowan.
- Bulls will be sold with the usual 6 month breeding warranty given from the date they leave Incheoch.

Collection

- We don't expect bulls to be uplifted on sale day—they will be rung before collection and we will do what we can to help delivery where possible.
- Bulls have not been semen tested prior to sale because they are running in large batches and we are trying to manage hormone levels!! They are sold subject to passing a test here before they leave.
- All stock can be left at Incheoch, at our risk, until the end of September. Bulls can be kept longer by separate agreement under a wintering option at £25/week.

Herd Health

The health and fertility of the Incheoch herd has always been a priority, being the bedrock of profitable cattle production. As well as controlling the 'Health scheme' diseases, the herd has enjoyed general good health and excellent fertility. Respiratory disease and scours, along with most of the common cattle ailments are rare at Incheoch and antibiotic use is minimal.

Johnes Disease: The herd is a member of the Premium Cattle Health Scheme run by SAC and has been pro-actively engaged in controlling Johnes Disease, over and above the requirements of the scheme, for 25 years. There have been no clinical cases within the herd for many years but one blood positive last year which was culled before dung test, maintains the herd as a risk level 3. In the last 8 years a total of 1761 individual blood tests have been carried out with only 6 positives. None of the animals presented for sale have a history of Johnes in their families.

BVD: The herd has been fully accredited for 17 years and is additionally vaccinated. All animals presented for sale are individually vaccinated and accredited.

Leptospirosis: There is no history of this disease in the herd and it is now policy not to vaccinate the herd.

IBR: The breeding herd is vaccinated, believed IBR free though not accredited. Bulls are not vaccinated.

If you have any questions regarding the health status please feel free to speak to Neil or call me at Thrums Vet Group on 01575 572643.

Graeme Richardson

Catalogue Details: We have tried to supply as much relevant information in the catalogue as we can, and present it as clearly as possible.

EBVs are shown in the format shown below. Please be aware that the EBVs for different breeds cannot be directly compared. For convenience, a colour code system highlights where the ebv falls within the wider breed genetic pool:

Lot 1 Incheoch Nanook UK 542191 204346 born 09/01/22 858 kg 43 cm (2nd Aug)

Nanook is a powerful, full-fleshed bull that has been a sale-leader all along. Good on his legs; a canny disposition with a bit of character; and out of a really nicely uddered young cow.

'Curve-bender' weight EBVs (low birth, high weaning and low cow weight). Top of the class for fat, milk and scrotal gives him a full house for maternal traits.

Lot 2 Incheoch Nomad P ET UK 542191 304347 born 12/01/22 836 kg 42 cm (2nd Aug)

Nomad is a full brother to Fontana stock bull here who left fantastic daughters with perfect udder and feet. We sold him in a moment of weakness and he is still working at 9yo for Shaun MacDonald at Torgorm. Another full brother,

Mungo, was Lot 3 last year.

Lot 3 Incheoch Nanton P

UK 542191 304438 born 31/03/22 764 kg 45 cm (2nd Aug)

Nanton is a smart, polled bull with a fantastic set of figures in an easy-fleshing package.

I6 is turning into one of our top cows. She calved at 24months, no assists over 5 calvings at a 366 day interval, and a perfect udder. Topping that, she stood 1st in a YFC stockjudging class of our best red cows this spring.

Lot 5 Incheoch Niko PP

UK 542191 604378 born 21/03/22 798 kg 43 cm (2nd Aug)

We think we've nailed it with Niko – Homozygous Polled; long, deep and wide; deep red and placid; milk, muscle and trait-leading calving ease; ...and he's a smart lad!

Dam calved at 23mths with 3 calvings at

351 day interval. Sire (pictured), breeds thick and easyfleshing.

Lot 7 Incheoch Noah PP

UK 542191 104436 born 31/03/22 762 kg 39 cm (2nd Aug)

Homozygous Polled, with top growth figures, Noah is an appealing looking bull out in the field.

Incheoch Iceman was a bull we were very proud of at the 1st sale—and were pleased to winter him for Rob Wainwright on Coll and got a little use before he left. Same dam-line as Lot 6.

Lot 8 Incheoch Neff PP

UK 542191 404404 born 25/03/22 738 kg 41 cm (2nd Aug)

Another Homozygous Polled Joker son, Neff and Noah are a very similar pair. They've been tight to split all the way through—although Neff's lower mature-weight prediction is starting to show.

J12 is turning into an ideal little cow -1st calved at 23mths, 4 un-assisted calvings at 358 interval and weaned 50% of her bulling weight.

Lot 9 Incheoch Nelson PP

UK 542191 604441 born 02/04/22 760 kg 40.5 cm (2nd Aug)

Homozygous Polled Nelson shows the thick, beefy stamp of both his sire, Joker and grandsire, Real Deal. He is a big, meaty bull with a bit of style.

Dam calved at 28mths with 4 calvings at 350 day interval, no assists and a nice udder. Same cow line as Lot 10 - G2 is an ET sister to G30.

Lot 13 Incheoch Nobel P

UK 542191 304515 born 06/05/22 702 kg 40 cm (2nd Aug)

Nobel is another youngster who we have every confidence will mature into a steady, reliable herd bull. His mother has a knack of breeding those sorts.

First calved at 26mths, D11 has an astonishing interval

of 358 days over 10 calvings with only 2 slight assists. A son (pictured) went to Quixwood.

Lot 15 Inchisla Eyre Y544

UK 542191 404544 born 29/03/22 kg cm

Eyre has been running with heifers. He lost his tail in an accident as a calf.

Nebo (pictured), trait leader for gestation length and 200 day weight in UK. Bred in a herd we admired on a visit to Australia, where he is a breed-leader for marbling, docility and calving ease.

Elsie E137 has had 14 calves, 12 by AI.

Lot 17 Dirnanean Barry

UK 542191 404432 born 30/03/22 Frame Score: 6.1 694 kg 42 cm (15th Aug)

V4 bred Anchor, sold to Dom Westcott, Dartmoor and N8 bred Waterloo, to Rob Wainwright on Coll. This is a strong and breedy cow-line with a pile of character. EBVs give a nice balance of beef & maternal traits.

Reference Sire Drinkstone Panamar P

Panamar packs an enormous capacity, depth and character into a medium frame—he has got to be the biggest little bull you've ever seen! He worked 4 seasons on the Island of Luing, then another 4 here, this being his last crop.

Ease-of-fleshing, correctness and style are his trademarks.

Reference Sire Luing Yanis

Sale Nov 2020

We really admired this bull's sire and dam on the Island of Luing. When Yanis came along as a youngster with the character, depth, square-made

> hips, deep, solid feet and big scrotal we thought he'd fit our herd. A solid set of EBVs—especially good calving ease and calving interval sealed the deal for us and he was top price at Cadzow Production

Reference Sire Te Mania Nebo

Te Mania Australia was a herd and breeding program that really impressed me when I spent a few days there in 2015. Although bred for the high marbled Japanese market, these no-nonsense cattle had plenty scope, growth and functionality.

Nebo is a Angus Australia trait leader for Calving Ease, Docility and Marbling.

We think he is a great fit for a heifer-bull: short gestation, low birthweight and easyfleshing cattle. UK EBVs below:

Reference Sire

Slievenagh Joker P

Our test for stock sires is *Do they fit into the 'Functional, Efficient & Robust' box.* Joker fits comfortably.

We like his depth and muscle pattern, his masculinity and disposition—and we like that he's never any hassle.

His daughters have calved at 2yo and are making a job of their calves without much fuss. His sons have a good bit of power and really tip the scales.

Bull Nutrition

Bull fertility and longevity have always been the key focus for us here at Incheoch and our approach to nutrition is designed to support that.

We've worked with Harbro for a number of years now; they understand what we're trying to achieve and design rations that make the best of what we grow on farm, combined with a few key quality products that fit our system.

Together we have come up with some diet parameters —minimum 50% forage on a DM basis, and maximum 20% Starch for bull rations.

The bulls on offer today have a steady life-time growth pattern of around 1.5 kgs per day.

- There is no creep fed, so that maternal ability can be properly gauged.
- Milk, Grass, Grass-silage and Grass again have been the basis of their diet.
- Supplements in first winter were bruised oats, distiller's grains and 1 kg of Buttercup Calf Rearer nuts.
- Supplement over this summer has been 2 to 3 kg per day of Calf Rearer nuts.

Wintering Option Available

It's fairly easy to winter a young bull to be fit to go to cows as a 2yo — it's another thing having him in sale condition, with a coat of hair and a layer of fat. Help us treat your young herd-sire's rumen and liver with care and buy early.

We can keep your bull at Incheoch until you are ready to take him, free of charge until the end of September, or further through the winter on a feed cost only. Keep payable at uplifted at $\pounds 25$ /week. Bulls will be looked after to the best of our ability and will remain at our risk when here. All bulls must be collected by end Feb.

Or why not get him home to acclimatise, maybe give him a turn with some cull cows and get him used to the farm.

Messrs Finlay McGowan
